

STANDARD OPERATING PROCEDURE (SOP)

AI Virtual Assistant Administrative Support & Automation Workflow

1. EXECUTIVE WORKFLOW ARCHITECTURE

This document details the standardized administrative procedures executed by the AI Virtual Assistant for daily operations, inbox triage, task tracking, and executive calendar management.

STAGE 01

Ingestion & Screening

Emails, messages, and task requests are automatically screened using Gemini AI for category classification and urgency rating.

STAGE 02

Dashboard Logging

Tasks are assigned priority tags and logged into the Master Excel Dashboard (Task Manager & Client CRM).

STAGE 03

Execution & Reporting

Draft responses, executive briefs, and calendar updates are generated and presented for final executive review.

2. OPERATIONAL TASK BREAKDOWN & TOOLS

Operational Area	Standard Procedure	Primary Tool	AI Automation Level
Email Management	Zero-Inbox triage, draft quick responses, flag urgent client inquiries.	Gmail / ChatGPT	High AI Assisted
Task Management	Maintain 01_Task_Manager.xlsx, set overdue alerts & priority tags.	Excel / Google Sheets	Semi-Automated
Calendar Planning	Schedule meetings, resolve time-zone conflicts, attach Zoom links.	Google Calendar	Manual / Rules
Client Tracking	Log leads, contract values, last contact dates, and follow-up alerts.	04_Client_Tracker.xlsx	Automated Formulas
Meeting Documentation	Record audio/notes, synthesize board minutes & extract action items.	Gemini / Word	High AI Assisted

3. QUALITY CONTROL & SECURITY STANDARDS

- **Data Privacy:** No sensitive financial or PII data is transmitted to unverified public AI models.
- **Human-in-the-Loop:** All AI-drafted emails and strategic documents require final human review prior to dispatch.
- **Backup Protocol:** Master Excel Workbook is auto-backed up to Google Workspace cloud storage daily.
